Advanced HTML

Novice

By: David Dias, Senior Software Engineer at HomeX

Weight: 1

 Your score will be updated as you progress.

Concepts

For this project, we expect you to look at this concept:

- HTML - elements of a web page (</concepts/870>)

(/)

YEAH! I HAVE LEARNED HTML

Welcome!

In this project, you will learn how to use HTML tags to structure a web page. No CSS, no styling - don't worry, the final page will be "ugly" it's normal, it's not the purpose of this project.

Important note: **details are important!** lowercase vs uppercase / wrong letter... be careful!

Resources

Read or watch:

- HTML 5.2 ([/rltoken/vKPDYmtKXaKCHn5IpZXz7w](#))
- HTML: HyperText Markup Language | MDN ([/rltoken/ZSMZYbNUWEhTarg4x5syCQ](#))
- HTML Reference - A free guide to all HTML elements and attributes ([/rltoken/hPxzkJUCKscaZ1YgG0Xaig](#))
- Can I use... Support tables for HTML5, CSS3, etc ([/rltoken/C1sjK7n4YYmXjzgN07LgUg](#))
- HTML Cheat Sheet - WebsiteSetup ([/rltoken/33djKxCai7mwDufKGL7eCg](#))

Learning Objectives

At the end of this project, you are expected to be able to explain to anyone (/rltoken/pt--DnAqjMfE-NJtA1N_8hg), **without the help of Google**:

- Which guidelines to follow for HTML
- How to create the skeleton of an HTML5 page
- How to use semantic HTML tags to structure a web page
- Which use cases to use `div` vs `span`
- The semantic value's of `header`, `main`, `footer`, `article`, `nav`, `section`, `aside`
- How to use headings (and why it's important to follow the hierarchical order)
- How to make lists in HTML
- The differences between medias (SVG, GIF, PNG, JPG)
- How to structure data in a table
- How to integrate a video in a webpage
- How to integrate an audio file in a webpage
- How to embed external content
- How to correctly structure an HTML page

Requirements

- A `README.md` file at the root of the folder of the project is mandatory
- Your code should be W3C compliant and validate with W3C-Validator (/rltoken/Ru21MgHZLPDcXSsUrHwKJg)
- Techium will be the name of the company we will use across our webpages.

Quiz questions

Great! You've completed the quiz successfully! Keep going! ([Show quiz](#))

Tasks

0. Create your first webpage

mandatory

Score: 100.00% (*Checks completed: 100.00%*)

Create your first HTML file `0-index.html` with:

- Add the doctype on the first line (without any comment)
- After the doctype, open and close a `html` tag
- Add the language tag, specify English for ISO language code (/rltoken/qFNHsNpEOoe4uGFKqVa6-Q) and add the direction tag (ltr or rtl) on the `html` tag.
- Open your file in your browser (the page should be blank)

W3C won't pass - you can ignore it

Repo:

- GitHub repository: `holbertonschool-web_front_end`
- Directory: `html_advanced`
- File: `0-index.html`

3/3 pts

1. Structure your webpage

mandatory

Score: 100.00% (*Checks completed: 100.00%*)

Copy the content of `0-index.html` into `1-index.html`

Create the head and body sections

- inside the `html` tag, create the `head` and `body` tags (empty) in this order

W3C won't pass - you can ignore it

Repo:

- GitHub repository: `holbertonschool-web_front_end`
- Directory: `html_advanced`
- File: `1-index.html`

[Help](#)[Review your work](#)[>_ Get a sandbox](#)**3/3 pts****2. The head - meta charset, viewport, title, description, favicons****mandatory**Score: 100.00% (*Checks completed: 100.00%*)Copy the content of `1-index.html` into `2-index.html`**Meta charset:**

- add a `meta` tag inside the `head` :
 - add the `charset` attribute with the value `utf-8`

Viewport:

- add a `meta` tag inside the `head` :

- (/)
- o add an attribute `name` on the tag and specify that it is the meta `viewport`
 - o add the key `width` with the value `device-width`
 - o add the key `initial-scale` with the value `1.0`
 - o add the key `viewport-fit` with the value `cover`

Title:

- add the `title` tag just after the meta `viewport` with value: Homepage - Techium

Description:

- add a `meta` tag inside the `head` section
 - o add an attribute `name` on the tag and specify that is the meta `description`
 - o add another attribute called `content`
 - o add the following description: Techium is a digital agency

Favicons:

- download the image above to use as a favicon
- Use the tool at <https://realfavicongenerator.net/> (/rltoken/MgBwcigOAB1UoLrRml5XAg) to generate all the favicon formats
- take the `favicon.ico` and `favicon.png` and place these at the root of your project directory, so that it is siblings with your `[0-9]+-index.html` files.
- inside the `head`, create 2 `link` tags with these 3 attributes: `rel`, `type`, and `href`.
 - o the first `link` tag:
 - `rel: icon`
 - `type: image/x-icon`
 - `href: ./favicon.ico`
 - o the second `link` tag:
 - `rel: icon`
 - `type: image/png`
 - `href: ./favicon.png`

Repo:

- GitHub repository: `holbertonschool-web_front_end`
- Directory: `html_advanced`
- File: `2-index.html`

[Help](#)[Review your work](#)[>_ Get a sandbox](#)**6/6 pts****3. Simple header, main, footer****mandatory**Score: 100.00% (*Checks completed: 100.00%*)Copy the content of `2-index.html` into `3-index.html`**Header:**

- create the `header` of your page between the open and close `body` tag

- put the text Header inside the header

(/)
Main:

- create the main tag after the header tag
 - put the text Main content inside your main tags

Footer:

- create the footer tag after the main tag
 - put the text Footer inside the footer tags

Repo:

- GitHub repository: holbertonschool-web_front_end
- Directory: html_advanced
- File: 3-index.html

[Help](#)[Review your work](#)[>_ Get a sandbox](#)**7/7 pts**

10. Level 3 headings

mandatory

Score: 100.00% (*Checks completed: 100.00%*)

Copy the content of 9-index.html into 10-index.html

Services headings:

- Inside the section containing the `h2` heading `Services`, add these elements right after the `h2` :
 - (/) ○ create a level 3 heading with text `Design & Concept`
 - create a level 3 heading with text `Digital Strategy`
 - create a level 3 heading with text `Content Strategy`
 - create a level 3 heading with text `UX Design`
 - create a level 3 heading with text `Web Development`
 - create a level 3 heading with text `Social Media`

Works headings:

- Inside the section containing the `h2` heading `Works` :
 - in the first `article`, replace the text with a level 3 heading with text `Interior Design`
 - in the second `article`, replace the text with a level 3 heading with text `Web Development`
 - in the third `article`, replace the text with a level 3 heading with text `Personal Brand`

About Us headings:

- Inside the section containing the `h2` heading `About Us`, after the `h2` heading, create these elements in this order:
 - a level 3 heading with text `Who are we`
 - a level 3 heading with text `Our culture`
 - a level 3 heading with text `How we work`

Latest news headings:

- Inside the section containing the `h2` heading `Latest news` :
 - in the first `article` replace the text with a level 3 heading with text `Hoc loco tenere se Triarius non potuit.`
 - in the second `article` replace the text with a level 3 heading with text `Ut alios omittam, hunc appello, quem ille unum secutus est.`
 - in the third `article` replace the text with a level 3 heading with text `Bestiarum vero nullum iudicium puto.`

26. Examples of lists for the styleguide

mandatory

Score: 100.00% (*Checks completed: 100.00%*)

Copy the content of `13-styleguide.html` into `26-styleguide.html`

Example of unordered list:

- inside `main` after `Paragraph` `section`, add :
 - (/) ○ a new line and a comment with text `Lists`
 - after, create a new `section` with `inside`:
 - create a `header` with `inside` a level 2 heading with the text `Lists`
 - after the new `header`, create a `div` with `inside`:
 - a level 3 heading with text `Unordered`
 - under it, add an unordered list with these items: `Dolor pulvinar etiam magna etiam.`, `Sagittis adipiscing lorem eleifend.`, `Felis enim feugiat dolore viverra.`

Example of ordered list:

- after previous unordered list, in the same `div`
 - add a level 3 heading with text `Ordered`
 - add an ordered list with these items:
 1. `Dolor pulvinar etiam magna etiam.`
 2. `Sagittis adipiscing lorem eleifend.`
 3. `Felis enim feugiat dolore viverra.`

Example of definition list:

- after previous ordered list, in the same `div`
 - add a heading level 3 with text `Definition`
 - add a definition list with these items:
 1. Term: `Definition List title`, Definition: `Definition text`.
 2. Term: `Startup`, Definition: A startup company or startup is a company or temporary organization designed to search for a repeatable and scalable business model.
 3. Term: `Water`, Definition: A colorless, transparent, odorless liquid that forms the seas, lakes, rivers, and rain and is the basis of the fluids of living organisms.

32. Typography section - using the correct tags

mandatory

Score: 100.00% (*Checks completed: 100.00%*)

Copy the content of 30-styleguide.html into 32-styleguide.html

- inside main after the Blockquotes section
 - add a new line and a comment with text Typography
 - create a new section

(1)

- in the section create a header and inside it add a level 2 heading with the text **Typography**
- after the header create a div , inside the div add this text with the correct HTML tag:
320 Stewart Avenue, Unit 12 (line break) New York City NY 10001 , the city, state, and postal code should be on a separate line
- create another div , in the new div nest this code block using the pre HTML tag:

```
<code>
    <h2>My title</h2>
    <p>Proin lacus turpis, feugiat sit amet sollicitudin non, volutpat in liber
o. Aenean hendrerit ultrices nulla ac lobortis. Vestibulum consectetur nibh vel
ante rhoncus faucibus.</p>
</code>
```

- create another div , in the new div add this paragraph of text with the correct HTML tag: Curabitur sit amet turpis cursus massa mollis highlighted. Duis finibus leo massa, eget dapibus erat finibus sed. Aenean condimentum sapien magna, eleifend highlighted mi consequat ut. Cras nec quam sed sapien ultricies highlighted ut sed metus. Each occurrence of the word highlighted should be highlighted.

36. Add images to your sections

mandatory

Score: 100.00% (*Checks completed: 100.00%*)

Copy the content of `35-index.html` into `36-index.html`

You can use image generators to get images for this task. For avatar images you can download them on UI Fades ([/rltoken/3QYgWo4ISo138DbTkldkdg](#)). Just make sure you rename your images to match the task requirements.

Add three images in the Works section:

- in the Works section
 - before the first level 3 heading create a div
 - add images/pic-work-01.jpg inside the div
 - alt: empty
 - before the second level 3 heading create a div
 - add images/pic-work-02.jpg inside the div
 - alt: empty
 - before the third level 3 heading create a div
 - add images/pic-work-03.jpg inside the div
 - alt: empty

Add one image in the About Us section:

- in the About Us section before the first level 3 heading inside the div
 - add the image images/pic-about-us.jpg
 - alt: empty
 - width: 460
 - height: 447

Add three images in the Latest news section:

- in the Latest news section
 - in the first article , before the first paragraph, create a div
 - in the div add the image images/pic-blog-01.jpg
 - alt: empty
 - width: 305
 - height: 205
 - in the second article , before the first paragraph, create a div
 - in the div add the image images/pic-blog-02.jpg
 - alt: empty
 - width: 305
 - height: 205
 - in the third article , before the first paragraph, create a div
 - in the div add the image images/pic-blog-03.jpg
 - alt: empty
 - width: 305
 - height: 205

Add three images in the Testimonials section:

- in the Testimonials section
 - in the first article before the quote, add the image images/pic-person-01.jpg
 - alt: Yuri Y. avatar
 - width: 100px
 - height: 100px
 - in the second article before the quote, add the image images/pic-person-02.jpg
 - alt: Dorrie S. avatar

(1)

- width: 100px
- height: 100px
- in the third article before the quote, add the image `images/pic-person-03.jpg`
 - alt: Sven H. avatar
 - width: 100px
 - height: 100px

Does not need to pass W3C
